

# INDEX

Fifty-ninth Quarto Volume—July 1, 1915, to December 31, 1915.

[Space forbids making the index of the *Railway Age Gazette* so detailed as to show every reference in the entire half year to every detail of every subject. General headings, therefore, are used which are intended to be inclusive, and if the reader fails to find a particular subject under the specific heading with which he connects it in his mind, if he will look under the general subject of which this is a branch he should find the article he is looking for. For instance, one of the articles published during this half year was entitled "Depreciation and Confiscation." This article dealt with the general subject of the Interstate Commerce Commission's accounting rules and in particular with their rules for charging for depreciation on equipment. The article is indexed, therefore, under Accounting—Depreciation and Confiscation. There is also, it might incidentally be mentioned, a cross reference Depreciation—see Accounting.]
